

Frequency Response Characteristic and Performance Computation in NorthEastern Region (Based on SCADA data)

As reported, at 17:59 hrs on 28th May 2024, due to failure of 125 MVA Transformer -2 Bay Bus-1 isolator chamber (GIS), Bus Bar Protection operated at 220kV Gorai EHV station. It led to tripping of 220kV Gorai – Versova Line, 220kV Gorai – Ghodbundar Line, 220kV Gorai – MSETCL Borivali Line 1, 220kV Gorai – MSETCL Borivali Line 2, 125 MVA Transformer-1 and 125 MVA Transformer-2. Maharashtra SLDC have mentioned a load drop of 1045 MW for Mumbai area only. Further, the load drop calculated based on the drop in ICT loadings of nearby 400kV substations in Maharashtra is 1587 MW. Therefore load loss of 1587MW has been considered for FRC computation.
